By Briana Riskin 195

Life Around Us, Life Within Us: Finding Our Creative Selves in Nature

By Pamela Burke, Ph.D. 201

PUBLISHER'S NOTE

Dear Reader:

Welcome to this first creativity anthology, *Inspiring Creativity*. This book was borne out of a creative moment. One minute the idea was not there, the next minute, it was. The concept came to me during conversations I had sharing coaching experiences with many of the contributors in this book. I realized that my coaching cohorts -- and others like them around the world - possessed a wealth of insights to share with artists and creators of all kinds. It dawned on me that many readers could benefit if each of these practicing creativity coaches would write their wisdom in a book... and then it hit me, why not make a single book with all their tips and advice?

Inspiring Creativity is thus intended to offer you a diverse range of thought and insight into how to develop your creative potential. The 22 articles are grouped into six categories, or sections, which address fundamental issues that creative people face at some point in their careers: the need to give themselves permission to create; the drive to find and hone good ideas; the lessons to learn about overcoming fears and blocks that interfere with deepening one's work, the difficulty of finding time and space every day to do your creative work; the importance of honoring your creative soul; and the challenge of going on a creative journey wherein you finally understand your inner creative essence, your guide...your own creative hero.

You are welcome to read this book article by article in sequence or you can dip into it by individual articles as you wish, seeking insights as they pertain to your specific interests or situation in the moment.

On behalf of all 22 contributors, it is our collective hope that this anthology will inspire you in powerful ways and that your work will slowly but surely begin to move you toward realizing your full creative potential.

ACKNOWLEDGMENTS

The Publisher would like to gratefully thank two special people who worked tirelessly and with great creative effort to make this book an attractive, professional publication:

- Cheryl Moote, who threw her amazing design talents into developing the cover and interior design of the book, and who went above and beyond the call of duty in laying out the pages and making the whole publication process go smoothly.
- Julie Simpson, who helped nurture the idea and contributed her valuable expertise and extensive volunteer time copy-editing and proofreading the entire manuscript and participating in several important decisions in this book's publication.

In addition, I want to thank Eric Maisel, whose writings and approach to creativity coaching have mentored all of us in this book, and who provided guidance to me during the course of this project.

Finally, I thank all contributors. This anthology could not exist without their intelligent, inspiring articles.
